

STRUCTURAL (Building) SERVICES

Missman is committed to providing our clients the BEST in Civil and Structural Engineering under one roof. In April 2005, we expanded our services to include structural engineering for commercial, educational, industrial and healthcare institutions.

Understanding the development process and having the ability to “fast track” projects is what makes us a top choice for getting the job done without sacrificing quality. We have always been able to keep on top of the task at hand by maintaining clear client communication and providing a quick response time--not to mention the ability to provide such multi-tasks as land surveying, environmental assessments, site engineering, and permitting. Structural services include:

- ◆ **New Facilities-Design**
 - * Buildings
 - * Hydraulic Structures
 - * Sewage Treatment Plants
 - * Water Treatment Plants
 - * Foundation Systems
- ◆ **Investigations and Reports**
 - * Load Rating Analysis
 - * Insurance Claim Reviews
 - * Existing Facility Condition Studies
 - * Repair and Renovation Planning and Design
- ◆ **Construction Related Services**
 - * Load Testing
 - * Value Engineering
 - * Shoring and Underpinning
 - * Temporary Retaining Systems and Braced Excavations
- ◆ **Industrial Services**
 - * New Facility Planning and Design
 - * Observation/Verification of Structural Testing for Manufactured Equipment
 - * Support Framing and/or Foundation Design
 - * Construction Observation
